WHERE SCIENCE MEETS ART

**2 October
2021**

**Salle perrier
of Pont 12**

**Stefania
Bertella**

A PhD student in Chemistry and Chemical Engineering at EPFL. In her work she uses extracts molecules from plants that can be used to replace or improve materials currently made of oil. On the side she is a poly-instrumentalist musician and composer, and she plays in a folk-rock band based in Lausanne.

**Sofya
Mikhaleva**

A biophysicist studying physical forces shaping bacterial communities in the gut. Outside work she loves spending time in nature or art museums, where she gets serenity and inspiration. Participates in the "Art of Science" workshop to place herself on the other side of the canvas and create a piece of art shaped by her scientific experience.

**Anna
Bolotova**

An artist & art-teacher of classic painting. Graduated from the Roerich Art College in St. Petersburg.

Kol

Self-taught Lausanne painter. Experiment to find the horizon.

Andrea Vucicevic
organizer

Concept creator and initiator of the "Art of Science" workshop. Ph.D. candidate at UNIL, molecular biologist by profession and illustrator by passion. As various biological phenomena result from gene interactions, interdisciplinary communication can also give something remarkable to observe and think about. She believes that imagination shapes our reality and may hold answers to some universal truths.

Irina Terekhova
organizer

PhD candidate at UNIL/ IHM (CHUV), working on an interdisciplinary thesis aiming to bridge modern art imagery with hallucinations inherent in psychotic states.
